

Changings for Webcluster of MixW after it has mooved from OH2AQ to <http://www.dxsummit.fi>

Band	Show
160m	Yes
80m	Yes
40m	Yes
30m	Yes
20m	Yes
17m	Yes
15m	Yes
12m	Yes
10m	Yes

WebCluster settings:

- Server: www.dxsummit.fi
- Port: 80
- Page: /text/dx25.html?
- Reload on dialog open:
- Auto reload:
- WWV page: (empty)
- Send page: /SendSpot.aspx
- Enable spotting:

MixW requires following changes in the Web Cluster settings

- Server: www.dxsummit.fi
- Port : 80
- Page : /text/dx25.html? (or /text/dx100.html?)
- Spots : /SendSpot.aspx

Version 2.18

The WebCl.dll module should be replaced with new one from the following archive:

Download : <http://mixw.net/beta/WebCl.zip> .

Old MixW works with this updated WebCl but since source pages are blank you can't get any spot.

It takes some time. Please be patient!

MiW 2.19 includes the new WebCl.dll .
